

What if there was one **solution for safety** everywhere you went?

A safety app for *everyone, everywhere.*

Schools
College campuses
Business campuses
Entertainment venues
Parks
Neighborhoods
Gyms
And more...

With Punch Alert in everyone's hands, you can crowdsource your safety to use the power of the masses to stop and deter crime and terrorism.

One App to Make the World a Safer Place

Join the movement.

Punch Alert allows location managers to immediately disseminate emergency warnings & alerts as well as non-emergency announcements to visitors, students and patrons. In locations protected by Punch Alert, users can submit emergencies along with more detailed information, text notes, images, videos, and audio recordings directly to the on-site emergency responders such as campus police or stadium security. This ensures the closest responders will be able to respond to your emergency.

This app will change the way we all approach safety, starting on protected campuses and then extending to everywhere you go.
