

## ENVIRONMENTAL PRODUCT DECLARATION

# LASER PRINTER MX622ADE

According to ISO 14025

Lexmark's innovative imaging solutions and technologies help customers worldwide print, secure and manage information with ease, efficiency and unmatched value. Lexmark simplifies the complex intersection of digital and printed information.

As part of the commitment to our customers, Lexmark performs Life Cycle Analysis on our products. The results of the LCA analysis continues to assist Lexmark in reducing the environmental impact of the hardware, software and services offered to our customers.

The Lexmark MX622ade offers printing at up to 50-ppm (letter) / 47-ppm (A4), enhanced security, high productivity and lower energy consumption. Supports demanding workloads through a powerful combination of printing, copying, and scanning, plus 650 sheets of tray input, standard. A tablet-like 7-inch [17.8-cm] e-Task touch screen supports convenience and productivity solutions, while one-pass two-sided scanning further enhances productivity. The long-life imaging unit, higher toner yields and available extra input trays minimize interruptions. And an optional integrated stapler provides finishing capabilities rarely found on desktop devices.

### Product Description

---

<b>Product Type</b>	Mono Laser Printer
<b>Printer Model</b>	MX622ade
<b>Maximum Print Speed</b>	50 pages per minute
<b>Intended use</b>	primarily office
<b>Range of applications</b>	print images or text in mono onto paper or paper-like media
<b>Product Lifetime</b>	5 years
<b>Introduction Date</b>	4/17/2018
<b>Product Specifications</b>	<a href="http://www.lexmark.com/en_US/products/series/printer-and-multifunction/finder.shtml">http://www.lexmark.com/en_US/products/series/printer-and-multifunction/finder.shtml</a>
<b>Functional Unit</b>	The functional unit has been defined as a 1,000 page simplex job in accordance with the Energy Star Typical Energy Consumption test procedure and the reference Product Category Rule (PCR).
<b>Scope of Validity / Applicability</b>	The EPD is representative for the printer model MX622ade sold as a stand-alone unit. This EPD and the reference PCR are applicable for printer sale and use in the North American market. Lexmark cannot guarantee that comparisons with EPDs of competitive products will be valid.
<b>Product Characterization</b>	A solutions-capable, network-ready mono laser printer with standard 2-sided printing, an 1.2 GHz quad-core processor, and 2GB of standard memory that prints up to 50 ppm mono (letter). The printer fuses to a medium (such as paper) to create hard copy images from electronic or hard copy originals. The printer product delivered to the customer consists of the printer, a power cord, printed setup instructions, a CD/DVD that includes the User Guide and Printer Drivers and an initial set of product supplies. The printer is delivered in packaging that can be recycled locally and is not needed for product operation. Product supplies include toner cartridges, imaging kits and the fusing mechanism. The power supply is internal to the product and the imaging kit and fusing mechanism are installed at the factory. Only the toner cartridges must be installed by the customer. The printer can be setup by the customer without

## Technical Data

Product specifications	Lexmark MX622ade	Lexmark MX622adhe
<b>Printing</b>		
Display	Lexmark e-Task 7-inch (17.8 cm) color touch screen	
Print Speed: Up to <sup>1</sup>	Black: 50 ppm	
Time to First Page: As fast as	Black: 6 seconds	
Print Resolution	Black: 1200 Image Quality, 1200 x 1200 dpi, 2400 Image Quality, 600 x 600 dpi	
Memory / Processor	Standard: 2048 MB / Maximum: 2048 MB / Quad Core, 1200 MHz	
Hard Disk	Option available	Included in configuration
Recommended Monthly Page Volume <sup>2</sup>	2000 - 20000 pages	
Maximum Monthly Duty Cycle: Up to <sup>3</sup>	175000 pages per month	
<b>Copying</b>		
Copy Speed: Up to <sup>4</sup>	Black: 50 cpm	
Time to First Copy: As fast as	Black: 6 seconds	
<b>Scanning</b>		
Scanner Type / ADF Scan	Flatbed scanner with ADF / DADF (single pass Duplex)	
A4/Ltr Duplex Scan Speed: Up to	Black: 94 / 100 sides per minute / Color: 60 / 64 sides per minute	
A4/Ltr Simplex Scan Speed: Up to	Black: 47 / 50 sides per minute / Color: 30 / 32 sides per minute	
ADF Paper Input Capacity: Up to	100 pages 20 lb or 75 gsm bond	
<b>Faxing</b>		
Modem Speed	ITU T.30, V.34 Half-Duplex, 33.6 Kbps	
<b>Supplies<sup>7</sup></b>		
Laser Cartridge Yields (up to) <sup>1</sup>	6,000-page Cartridge, 15,000-page High Yield Cartridge, 20,000-page Extra High Yield Cartridge, 25,000-page Ultra High Yield Cartridge	
Imaging Unit Estimated Yield: Up to	60000 pages, based on 3 average letter/A4-size pages per print job and ~ 5% coverage	
Cartridge(s) Shipping with Product <sup>1</sup>	6,000-page Starter Return Program Toner Cartridge	
<b>Paper Handling</b>		
Included Paper Handling	550-Sheet Input, 100-Sheet Multipurpose Feeder, Integrated Duplex, 250-Sheet Output Bin	
Optional Paper Handling	250-Sheet Tray, 550-Sheet Tray, 550-Sheet Lockable Tray, Inline Stapler	
Paper Input Capacity: Up to	Standard: 650 pages 20 lb or 75 gsm bond / Maximum: 2300 pages 20 lb or 75 gsm bond	
Paper Output Capacity: Up to	Standard: 250 pages 20 lb or 75 gsm bond / Maximum: 250 pages 20 lb or 75 gsm bond	
Media Types Supported	Card Stock, Envelopes, Paper Labels, Plain Paper, Transparencies, Refer to the Paper & Specialty Media Guide	
Media Sizes Supported	10 Envelope, 7 3/4 Envelope, 9 Envelope, A4, A5, DL Envelope, Executive, Folio, JIS-B5, Legal, Letter, Statement, Universal, Oficio, A6	
<b>General Information<sup>4</sup></b>		
Standard Ports	One Internal Card Slot, USB 2.0 Specification Hi-Speed Certified (Type B), Gigabit Ethernet (10/100/1000), Front USB 2.0 Specification Hi-Speed Certified port (Type A), Rear USB 2.0 Specification Hi-Speed Certified Port (Type A)	
Optional Network Ports / Optional Local Ports	Marknet N8372 WiFi Option / Internal RS-232C serial, Internal 1284-B Bidirectional Parallel	
Noise Level: Operating	Print: 55 dBA / Copy: 56 dBA / Scan: 55 dBA	
Specified Operating Environment	Humidity: 8 to 80% Relative Humidity, Temperature: 10 to 32°C (50 to 90°F), Altitude: 0 - 5000 Meters (16,404 Feet)	
Limited Warranty - See Statement of Limited Warranty	1-Year Onsite Service, Next Business Day	
Size (in. - H x W x D) / Weight (lb.)	21.5 x 19.3 x 18.8 in. / 49.2 lb.	

All information in this brochure is subject to change without notice. Lexmark is not liable for any errors or omissions.

**This is a Class A device according to the FCC Rules and international electromagnetic emissions standards. This device is not intended for use in residential or domestic environments due to potential interference to radio communications.**

<sup>1</sup>Average standard page yield value declared in accordance with ISO/IEC 19752. <sup>2</sup>"Recommended Monthly Page Volume" is a range of pages that helps customers evaluate Lexmark's product offerings based on the average number of pages customers plan to print on the device each month. Lexmark recommends that the number of pages per month be within the stated range for optimum device performance, based on factors including: supplies replacement intervals, paper loading intervals, speed, and typical customer usage. <sup>3</sup>"Maximum Monthly Duty Cycle" is defined as the maximum number of pages a device could deliver in a month using a multishift operation. This metric provides a comparison of robustness in relation to other Lexmark printers and MFPs. <sup>4</sup>Printers are sold subject to certain license/agreement conditions. See [www.lexmark.com/printerlicense](http://www.lexmark.com/printerlicense) for details. <sup>5</sup>Actual Yield may vary based on other factors such as device speed, paper size and feed orientation, toner coverage, tray source, percentage of black-only printing and average print job complexity. <sup>6</sup>Print and copy speeds measured in accordance with ISO/IEC 24734 and ISO/IEC 24735 respectively (ESAT). For more information see [www.lexmark.com/ISOspeeds](http://www.lexmark.com/ISOspeeds). <sup>7</sup>Product functions only with replacement cartridges designed for use in a specific geographical region. See [www.lexmark.com/regions](http://www.lexmark.com/regions) for more details.

# ENVIRONMENTAL PRODUCT DECLARATION

According to ISO 14025

## System Boundary

The study considers all phases of the life cycle, as shown below.

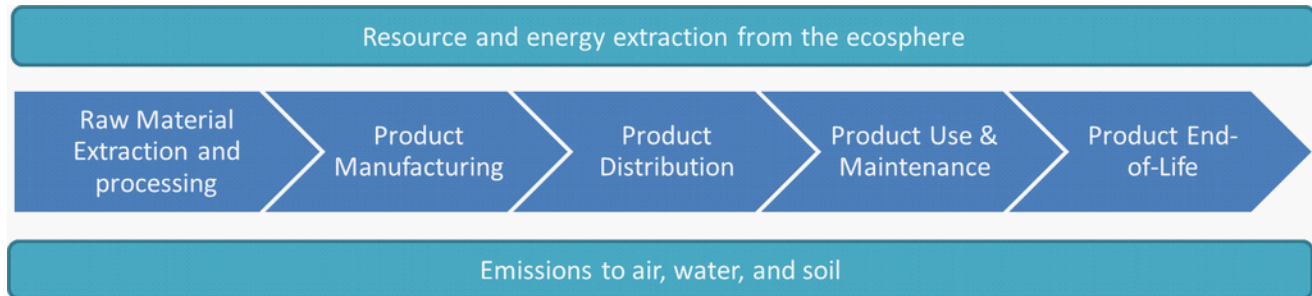

Figure 1: System Boundaries

## Declaration of Basic Materials

The printer consist of mechanical, electromechanical, and electronic components. Its material composition can be described using the basic material fractions given below. Please note that the category 'Electronics' also includes all wiring.

Material	Mass (kg)
<b>Plastics (recyclable)</b>	9.75
<b>Plastics (non-recyclable)</b>	1.46
<b>Ferrous Metals</b>	8.63
<b>Aluminum</b>	0.0587
<b>Copper</b>	0.004
<b>Glass</b>	0.848
<b>Electronics</b>	1.19
<b>Other Materials</b>	0.127

Table 1: Basic Material Declaration

## Product Supply Chain

The printer is manufactured and assembled in Southeast China. The cartridges for the North American market are manufactured and assembled in Juarez, Mexico.

# ENVIRONMENTAL PRODUCT DECLARATION

Printers and multi-functional printing units

According to ISO 14025

## Life Cycle Assessment Results

The following sections describe the printer's potential environmental impacts over the full printer life cycle. These represent the typical impacts for an average system sold in the North American market. All impacts are presented per functional unit of printing 1,000 images of the reference standard.

### Manufacturing Material and Resources Inventory

Table 2 displays the use of material resources (kg) and of non-renewable as well as renewable primary energy demand necessary for printer manufacturing, but excludes other life cycle stages of the printer (cradle-to-gate). Likewise, material and energy consumption associated with printer packaging, cartridges, and paper is excluded here.

Use of Material Resources [kg]	
Non-Renewable	1.02E003
Renewable (excl. water)	1.17E003
Water	1.18E005
Use of Non-Renewable Primary Energy [MJ]	
Crude Oil	388
Hard Coal	946
Lignite	32.8
Natural Gas	746
Uranium	88.5
Use of Renewable Primary Energy [MJ]	
Biomass	0.237
Geothermal	1.22
Solar	56.6
Wind	28
Hydropower	81.6

Table 2: Use of Material and Energy Resources for Printer Manufacturing (Cradle-to-Gate)

### Energy Consumption During Utilization

Based on the EnergyStar Typical Energy Consumption (TEC) test methodology, the printer is expected to have the following power consumption for an assumed average job load.

	Per 1,000 page	Per product lifetime
Energy Consumption During Utilization [kWh]	0.337	546

Table 3: At-wall power consumption during utilization

# ENVIRONMENTAL PRODUCT DECLARATION

Laser Printer MX622ade  
Printers and multi-functional printing units

## Life Cycle Impact Assessment

The following provides an overview of the potential printer life cycle impacts with emissions classified and characterized to standard environmental impact metrics using the ReCiPe 2016 Hierarchist (H) midpoint characterization factors (v1.1).

Note that the mineral resource depletion results do not include any contributions from the paper life cycle as the AF&PA report does not allow for the conversion to ReCiPe 2016.

Ecotoxicity and human health are not included in this study, as per the PCR, due to their respective uncertainties.

LCIA results are relative expressions and do not predict impacts on category endpoints, the exceeding of thresholds, safety margins or risks.

ReCiPe2016, version 1.1	per 1000 pages including paper	per 1000 pages excluding paper	per printer lifetime including paper	per printer lifetime excluding paper
Global Warming Potential [kg CO <sub>2</sub> eq.]	7.93E00	1.55E00	1.29E04	2.51E03
Ozone Depletion Potential [kg CFC-11 eq.]	5.77E-07	5.77E-07	9.36E-04	9.36E-04
Acidification Potential [kg SO <sub>2</sub> eq.]	7.28E-03	7.28E-03	1.18E01	1.18E01
Eutrophication Potential [kg P eq.]	1.10E-05	1.10E-05	1.79E-02	1.79E-02
Fossil Fuel Depletion Potential [kg oil eq.]	5.28E-01	5.28E-01	8.56E02	8.56E02
Mineral Resource Depletion Potential [kg Cu eq.]	2.25E-02	2.25E-02	3.65E01	3.65E01

Table 3: Summary of Life Cycle Impact Assessment Results

# ENVIRONMENTAL PRODUCT DECLARATION

Laser Printer MX622ade  
Printers and multi-functional printing units

## Interpretation of Results

### Dominance Analysis

Due to the 5 year lifetime and the number of pages printed per day as established by the Energy Star Typical Energy Consumption test procedure, the use phase heavily dominates the life cycle impacts. The below tables and charts display the results of the dominance analysis for each impact category addressed in Table 3.

#### Global Warming Potential

ReCiPe2016, version 1.1	per 1000 pages including paper	per 1000 pages excluding paper	per printer lifetime including paper	per printer lifetime excluding paper
Printer	9.51E-02	9.51E-02	1.54E02	1.54E02
Lexmark use phase <LC>	7.83E00	1.45E00	1.27E04	2.36E03
Lexmark EoL phase <LC>	1.14E-03	1.14E-03	1.84E00	1.84E00

---

### Assumptions and Estimations

---

Assumptions and estimations follow the governing PCR on printing equipment. Full details are documented in the EPD's background report, which was provided for verification purposes alongside the EPD. The LCA results represent the specific printer model as sold in the North American market.

In line with the PCR, the model assumes a printer lifetime of five (5) years. The printer is modeled to print an average of 1.25E003 pages per day based on a maximum print speed of 50 images per minute. The printer further possesses an automatic mechanic duplexing feature.

Power consumption figures are based on Energy Star testing of the printer using the average job load described above. Consumables consumption is based on the market-average yield across all available cartridge capacities. In addition, market-average use of remanufactured cartridges is taken into account, as applicable.

Transportation distances to the end consumer are based on their points of origin and the population-weighted average distance to the 100 most populous cities in the continental US based on 2010 census data. The printer as well as replacement fuser kits and waste toner bottles are manufactured in China and shipped to the point of use from the distribution center near Nashville, TN, while the cartridges and the imaging unit are shipped from Ciudad Juarez, MX.

The LCI data for office paper is adopted from the uncoated, free sheet paper inventory developed by the American Forest & Paper Association (AF&PA). This paper dataset assumes that average office paper contains 4% recycled content. The mass of consumed paper is based on the US letter format and a surface weight of 75 g/m<sup>2</sup>. The AF&PA data includes paper production, transportation, and End-of-Life treatment (72% recycling, 23% landfill, 5% incineration).

The End-of-Life treatment for the printer is based on the assumption that 66.7 % of the printers are returned to Lexmark for recycling, while the remainder is disposed of through local waste streams, where the metal fractions are assumed to be recycled and the remainder landfilled. The EoL cartridges are assumed to go to remanufacturing, recycling, and landfill in equal shares.

In accordance with the cut-off methodology prescribed by the governing PCR, materials sent to End-of-Life recycling are considered to cross the system boundary without any further transformation. Only the impacts associated with waste transportation and disposal are included in the results.

---

### Description of Data and Period Under Consideration

---

All primary data is based on technical documentation and sales data accessed in 2018. All background data is taken from the GaBi 2018-8.6.20 Databases. No primary data is collected from the Original Equipment Manufacturer's manufacturing plant.

## ENVIRONMENTAL PRODUCT DECLARATION

Laser Printer MX622ade  
Printers and multi-functional printing units

According to ISO 14025

---

### Data Quality

---

Manufacturing data of printers and consumables is based on a combination of Bills of Material and teardown analyses and is considered to be of overall high quality with low uncertainty. Distribution from printer manufacturing to the end consumer is representative of logistical data from Lexmark and best estimates of US average shipping distances, and is of moderate quality and high uncertainty.

Printer power consumption represents measured power consumed during printer operation in accordance with the use scenario outlined in the reference PCR and is of high quality and moderate uncertainty; actual print loads may differ. Toner cartridge use is based on expected yields based on the ISO test standards for cartridge use, and is of high quality and low uncertainty. Replacement rate for consumable parts is based on part design specifications, and is of high quality and moderate uncertainty.

The disposition of the printer and consumables at End-of-Life is based on best-available information by the respective experts at Lexmark. This data is of average quality and moderate uncertainty.

### Background Data

---

All background datasets relevant to production, power generation, transportation, and material disposal were taken from the GaBi 2018-8.6.20 Databases.

The data used for office paper is based on the data developed for the American Forest & Paper Association (AF&PA) and is representative for average North American office paper production in 2010.

The additional use of third-party background data from industry associations (e.g., worldsteel) is documented in the background report. They represent the latest LCI data as available in the GaBi 2018-8.6.20 Databases.

### Allocation and Methodological Principles

---

No significant allocations have been considered for the production of the printer. Allocation of production or use impacts across the various functions of a multi-function system is not included (i.e., allocation of production impacts to the provision of scanning services) and the impacts from all life cycle stages are considered within the system boundaries for the printing system.

Treatment of recycled or resold material is not considered in the body of the EPD, in accordance with the cut-off methodology required by the governing PCR.

A description of all of the methodological decisions made in modeling the life cycle impacts of office paper, including descriptions of the approach to modeling carbon sequestration and paper recycling, are described in the American Forestry & Paper Association's LCA report on printing and writing papers.

## Additional Environmental Information

As required by the governing PCR, the assessment of human toxicity and ecotoxicity shall be included in this additional information section. The following metrics, which are based on the scenario 'per printer lifetime including paper' can help identify toxicity hot spots, but decision-making should also consider an exposure assessment.

	USEtox - Ecotoxicity [CTUe]	USEtox - Human toxicity (cancer) [CTUh]	USEtox - Human toxicity (non-cancer) [CTUh]
Printer use - Cartridges/Toner	7.07E 00	7.94E -08	2.75E -09
Printer use - Distribution	2.34E -01	2.56E -10	6.57E -11
Printer Use - Energy	4.72E -01	1.11E -08	7.67E -10
Printer use - Maintenance	4.92E 00	3.70E -08	3.54E -09
Printer use - Packaging	3.35E -01	2.47E -08	2.02E -07
Printer use - Waste treatment	1.26E -01	1.59E -09	1.60E -09
