

NEW 2023

# M-Series Elevate 5.1.2 Immersive Sound Bar

## Configuration

42" Sound bar with  
wireless subwoofer

## What's New

Patented Adaptive Height Speakers, now available in M-Series.

Dolby Atmos® and DTS:X® sound wrapped in an award-winning design.

Advanced connectivity like HDMI eARC for performance without compromise.

Auto-Rotating  
Adaptive Height Speakers

## Audio Quality

**A revolution in design.** Adaptive Height Speakers integrated into the sound bar automatically rotate up or forward to optimize the performance of the system. When rotated up, Dolby Atmos® and DTS:X® soundtracks are strikingly immersive. When rotated forward, the height speakers are repurposed to deliver music with breathtaking power and dynamics.

**An immersive powerhouse.** Dolby Atmos® and DTS:X® audio technologies captivate your senses with realistic sounds above and behind you for performance that completely immerses you in the world of your entertainment.

**Multi-dimensional masterpiece.** Experience the thrill of sound that moves throughout your room with 5.1.2 channels of immersive audio and up to 103dB of output. 13 high-performance speakers, including a redesigned subwoofer and two low-profile satellites, deliver powerful, room-filling sound with impact down to 45Hz.

## Thoughtful Design

**Award-winning design.** Recognized by the prestigious International Forum Design with a 2022 iF Design Award, the 42-inch low-profile enclosure is draped in premium grade charcoal-colored fabric and punctuated on either end by a pair of spun aluminum discs that subtly reflect the light when in motion.

**Truly radiant.** Customize the atmosphere to fit your mood with color-changing LED lights built into both ends of the sound bar. They illuminate automatically when the Adaptive Height Speakers are activated and may be disabled if preferred.

## Peak Simplicity

**Just one wire. Maybe two.** Unlock the highest-quality audio formats like Dolby Atmos® with the simplicity of a single HDMI eARC connection. And with full support for 4K HDR and Dolby Vision passthrough, the sound bar is ready with an additional HDMI input should you need one.

**Pair. Connect. Stream. Bliss.** Wirelessly stream your favorite music, podcasts, and more directly to your sound bar from a compatible mobile device using the included Bluetooth functionality.

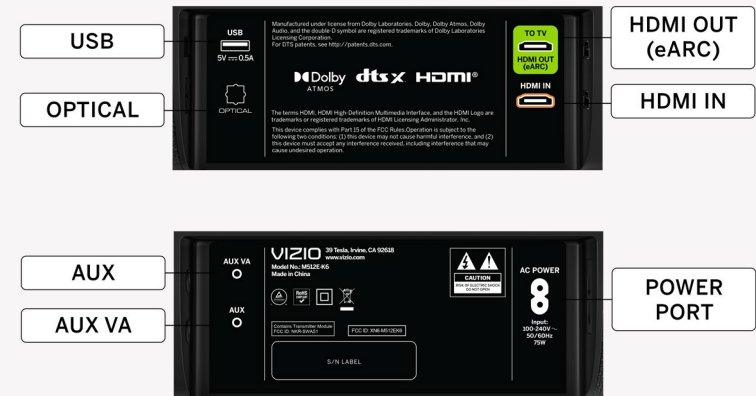

**Better together.** Enjoy easier setup and control when connected to select VIZIO televisions using HDMI. The integrated audio menu makes fine tuning audio settings a breeze with a big-screen interface that's easily controlled simply with the VIZIO TV remote.

# M-Series Elevate 5.1.2 Sound Bar

Model Number: M512e-K6

## Inputs & Outputs

## Configuration

Sound Bar Length	42"
Number of Channels	5.1.2
