# AVerMedia

# AS311 AI SPEAKERPHONE

## Seamless communication, anywhere

### START AN AUDIO CONFERENCE IN SECONDS

The AS311 speakerphone sets up quickly and easily with USB plug and play connectivity. The single-corded design ensures a smooth, clutter-free setup and stable connection for conference calls without having to worry about running out of power or technical difficulties. The AS311's omnidirectional microphone and speaker will pick up and broadcast sharp sound in all directions (up to 9.8 ft./3 m), turning any environment into a meeting space that is flexible and hands-free. Leveraging AVerMedia's AI technology, the AS311 speakerphone suppresses distracting background noises, such as your baby crying, your dog barking, household appliances, and more, to deliver uninterrupted vocal clarity to meeting participants.

The AS311 turns any space into a conferencing environment, no matter if you are in the office, at home, or outside. With its ergonomically designed touch buttons you can easily control your call without fumbling for your mouse --turn the volume up and down, power on/off AI noise reduction and mute or unmuting yourself with ease.

### AI-POWERED NOISE SUPPRESSION

Reduce background noises for productive meetings

### 360° AUDIO COVERAGE

Enhance audio from all directions, turning any environment into a meeting space

### USB 2.0 PLUG AND PLAY

Set up and use with easy USB plug and play connectivity
