CAP-2

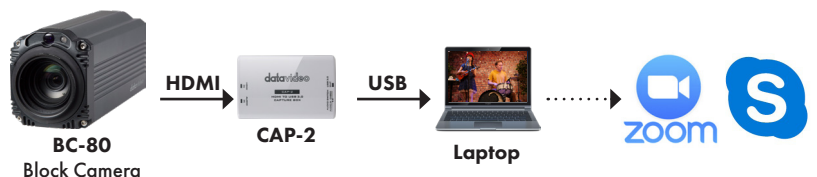

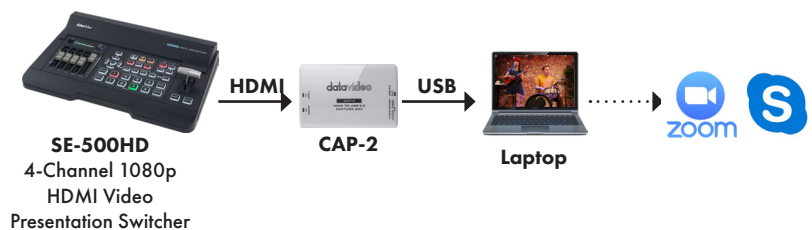

HDMI to USB 3.0 Capture Box

This new capture device takes HDMI in with embedded or external audio and converts to USB 3.0 to connect your AV signal directly to your computer for streaming, recording or video conferencing. The USB compliant CAP-2 is ideal to use with any HDMI equipped camera or switcher and it's plug-n-play design requires no drivers to install. Stream from your HDMI source directly to YouTube, Facebook or popular conferencing services such as Zoom, SKYPE, Teams or GotoMeeting.

CAP-2 Features:

- Mini-Jack input for audio (embed an audio source)
- Power source from USB connection – no power supply needed
- USB 3.0 for 1920x1200p60 resolution
- Scalable video resolution
- Connect to video conference platform
