Safe-IT UL 1363A Medical-Grade Power Strip for Patient-Care Vicinity, 4x Hospital-Grade Outlets, 3 ft. Coiled Cord

MODEL NUMBER: **PS-410-HGOEMCC**

Versatile power strip with coiled cord supplies power to movable plug-connected components mounted to IV poles, mobile carts, crash carts and mobile medical workstations in operating rooms and patient-care vicinities.

Description

The PS-410-HGOEMCC Medical-Grade Power Strip supplies power to movable plug-connected components mounted to a rack, table or pedestal in operating rooms, patient-care vicinities, therapy rooms, imaging environments and administrative areas. Compliant with UL 1363A specifications, this 120V, 50/60 Hz power strip features a NEMA 5-15P-HG hospital-grade plug and four NEMA 5-15R-HG hospital-grade outlets.

The power strip is protected by a patented antimicrobial powder coating with EPA-registered and FDA-compliant silver ionic technology. The antimicrobial surface protection is 99.9 percent effective in inhibiting the growth of bacteria and reducing the risk of HAIs in hospitals and other medical environments. The coating meets the requirements of JIS Z 2801:2000, an international standard for evaluating efficacy in antimicrobial products.

Two built-in resettable 15A circuit breakers control power to all outlets and protect the power strip against overloads. Switchless design prevents the unit from being accidentally shut off. The coiled power cord is three feet (0.9 meters) long, and can be fully extended to 10 feet (3 m).

Mounting flanges let you install the PS-410-HGOEMCC on a wide variety of surfaces, such as IV poles, mobile carts, crash carts and mobile medical workstations. The all-metal housing ensures safety and is guaranteed to last a long time in demanding environments.
