

**HIGH BRIGHTNESS BUSINESS PROJECTORS
EB-L12000QNL/L20000UNL**

EPSON
EXCEED YOUR VISION

BRIGHT, BRILLIANT & DETAILED.

EPSON
EXCEED YOUR VISION

Get ready to impress and do even more with the EB-L12000QNL and the EB-L20000UNL high brightness laser projectors. Deliver stunning images in native 4K resolution¹, and revel in colour brightness of up to 20,000 lumens with Epson 3LCD technology. Enjoy ease of mobility and installation flexibility. And high reliability with a robust design protected by a triple layered dust-proof structure. Put together, businesses now have all it takes in Epson to make a powerful impact on a bigger stage.

IT'S IN THE DETAILS.

With 3LCD panels, every projection gives you spectacular true colours.

POWERFUL PRECISION

Colour brightness in outstanding levels of up to 20,000 lumens with spectacular image quality delivered in native 4K resolution¹ for best of both power and details.

RELIABLE PERFORMANCE

Robust design with triple layered dust-proof structure, plus 20,000 hours² maintenance free.³

HIGHER INSTALLATION FLEXIBILITY

Engineered for greater mobility and higher installation flexibility, supported by Epson Professional Tools and innovation.

* All information are up to date as of September 2019.

¹ Native 4K resolution available only on Epson EB-L12000QNL.

² 20,000H life for laser light source: Approximate time until brightness decreases 50% from first usage. Measured by acceleration test assuming use of 0.04 - 0.20 mg/m³ of particulate matter. Time varies depending on usage conditions and environments. Replacement of parts other than the light source may be required in a shorter period.

³ No maintenance for the light source required up to 20,000H.

Powerful & Compact

Native 4K† Panel

One single chip, 1.03-inch native 4K panel delivers ultra-high definition image quality with a native resolution of 3840x2160. The panel with its 6 μm pixel-pitch is designed by Epson and manufactured to the highest standards in Epson Japanese factories.

Total Liquid Cooling System

A newly developed liquid cooling system maintains optimal temperatures of key optical elements. The inorganic LCD panels, inorganic phosphor wheel and laser light source are kept at optimal temperature no matter how the projector is installed. This efficient cooling system contributes to minimising body size and noise.

20,000-Hour Maintenance Free

A newly designed laser light source and advanced electrostatic filter deliver 20,000 hours* of maintenance-free for the laser light source only.

Inorganic LCD panels and an inorganic phosphor wheel combine with a dust-proof design for 20,000 hours of warranty†. Additionally, the laser light source is highly reliable, eliminating the worry of the light burning out during important presentations.

Inorganic LCD panels

LD (laser diode) package

Inorganic phosphor wheel

Electrostatic filters

† Only for EB-L12000QNL.

* 20,000H life for laser light source : Approximate time until brightness decreases 50% from first usage. Measured by acceleration test assuming use of 0.04 - 0.20 mg/m³ of particulate matter. Time varies depending on usage conditions and environments. Replacement of parts other than the light source may be required in a shorter period.

† Three years or 20,000 hours, whichever comes first.

Powerful & Compact

High Contrast Ratio

Add brilliance to your presentations. Boasting stunning brightness of up to 20,000 lumens and a high contrast ratio of 2,500,000:1, these projectors enable you to project beautiful, well-defined images wherever you are, regardless of ambient light.

Light-Out Control

You can control the laser light source, turning it on or off based on the black level value of the video signal.

Frame Interpolation*

By analysing frame-by-frame then generating intermediate frames for 100Hz/120Hz frame rate, EB-L20000UNL delivers smooth video with less after images, even when projecting sports and other fast-moving content.

* Only for EB-L20000UNL.

* Simulated images

High Dynamic Range

EB-L12000QNL/L20000UNL supports HDR10 and Hybrid Log Gamma for dynamic output over a broad tonal range with a minimum of white or black spotting.

SDR (standard dynamic range)

HDR (high dynamic range)

* Simulated images

Image Enhancement

Epson's unique high-quality image signal processing maintains edge crisp and highly detailed edges.

Without image enhancement technology

With image enhancement technology

* Simulated images

Reliable Performance

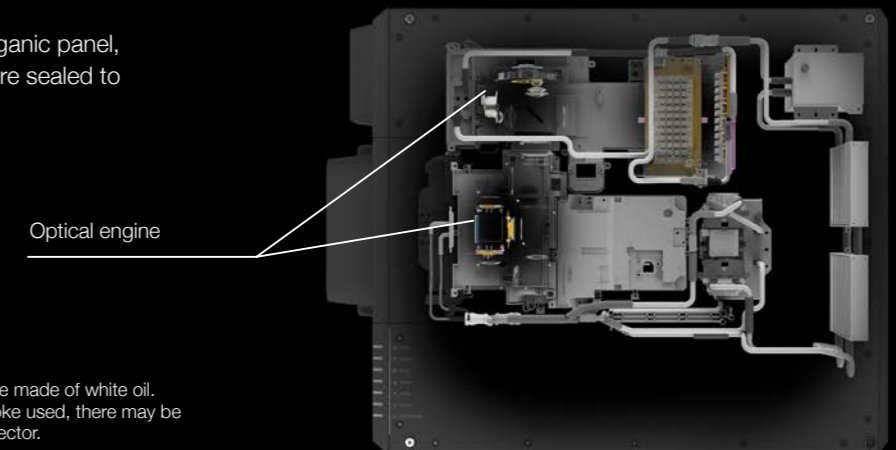

Triple-Layer Dustproof Structure

EB-L12000QNL/L20000UNL has three layers of protection for excellent durability and dust-resistance. The light source and optical elements are both sealed, and the newly developed total liquid cooling system splits airflow while reducing incoming air to the optical engine by 86%* compared to conventional models[†]. In addition, replaceable 20,000-hour[^], maintenance-free electrostatic filters cut dust intake to miniscule levels.

Sealed Optical Engine

Key optical components, including the inorganic panel, inorganic phosphor wheel and laser bank are sealed to prevent contamination by dust or smoke*.

* Measured by acceleration test assuming use of smoke made of white oil. Depending on the usage conditions and types of smoke used, there may be a case to clean up or replace components of the projector.

Long-Life, Replaceable Electrostatic Filters

Electrostatic filters give you 20,000 hours* of maintenance-free use and vastly reduce incoming dust impairing optical components.

Robust Body

The adoption of a pipe frame and baseplate structure has greatly improved the durability of the casing. By redesign the internal structure, we achieved the compact and lightweight design for easy installation.

86% Reduced Airflow And Sealed Engine

The total cooling system takes in air independently for both the radiator and power supply. This reduces airflow to the optical engine by 86%* compared to conventional models. With lesser airflow, there is lesser chance of dust penetration into the machine.

* Compared with EB-L25000U. Measured by acceleration test assuming use of 0.04 - 0.20 mg/m³ of particulate matter. Results may vary depending on usage conditions.
[^] 20,000H life for laser light source : Approximate time until brightness decreases 50% from first usage. Measured by acceleration test assuming use of 0.04 - 0.20 mg/m³ of particulate matter. Time varies depending on usage conditions and environments. Replacement of parts other than the light source may be required in a shorter period.

* 20,000H life for laser light source : Approximate time until brightness decreases 50% from first usage. Measured by acceleration test assuming use of 0.04 - 0.20 mg/m³ of particulate matter. Time varies depending on usage conditions and environments. Replacement of parts other than the light source may be required in a shorter period.

Reliable Performance

Status Monitor

Quickly check the signal, voltage and network information via the monitor.

Power Supply Log

Monitor and log times with drops in voltage. The ability to log up to 30 voltage drops can help determine the cause of unexpected shutdowns.

Settings On Standby

Configure IP settings and reset default values without powering up.

Mechanical Shutter

The mechanical shutter inside the unit is protected against damage from laser lights that are sometimes part of lightshows.

Zero Offset, Ultra Short-Throw Lens

This lens is especially useful for environments with extremely limited lens-to-screen distances. Ultra Short Throw Ratio of 0.35 and the zero-offset, bending optical system enables projection onto 100" projection at 74cm away. These features combine with lens shift* to simplify operation and expand usability.

* With EB-L12000QNL, Horizontal: -10% to +10% / Vertical: +45% to +68%

* With EB-L20000UNL, Horizontal: -15% to +15% / Vertical: +45% to +70%

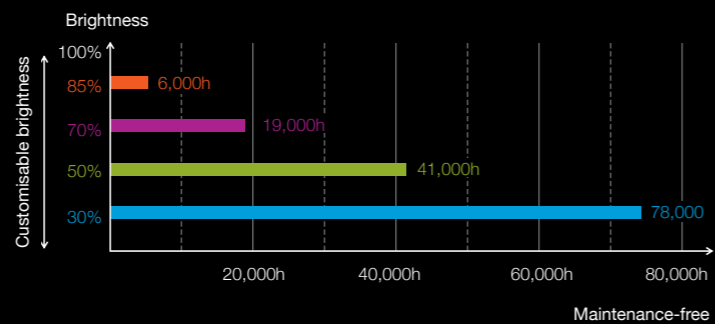

Wider Lens Shift Range

The extremely wide-ranging lens shift was realised through a change in design and careful consideration of the lens and optical engine combination. Furthermore, the adoption of an improved stepping motor for the range shift mechanism allows for more precise adjustment.

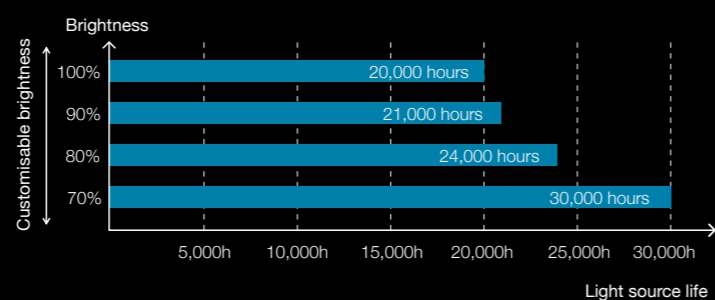

Constant Brightness

Maintaining a specific brightness over a prolonged period of time, depending on the application, offers increased flexibility. Venues such as an art museum can take advantage of this feature in situations where constant brightness is a must.

Custom mode with constant brightness

Custom brightness

* Approximate time until brightness decreases 50% from first usage. Time varies depending on usage conditions and environments.

Larger image from shorter distances, plus added installation flexibility

Lens shift range

* When using the ELPLM15 lens

* 58% (max.) vertically; 16% (max.) horizontally for EB-L12000QNL

Powered Lens Lens Position Memory

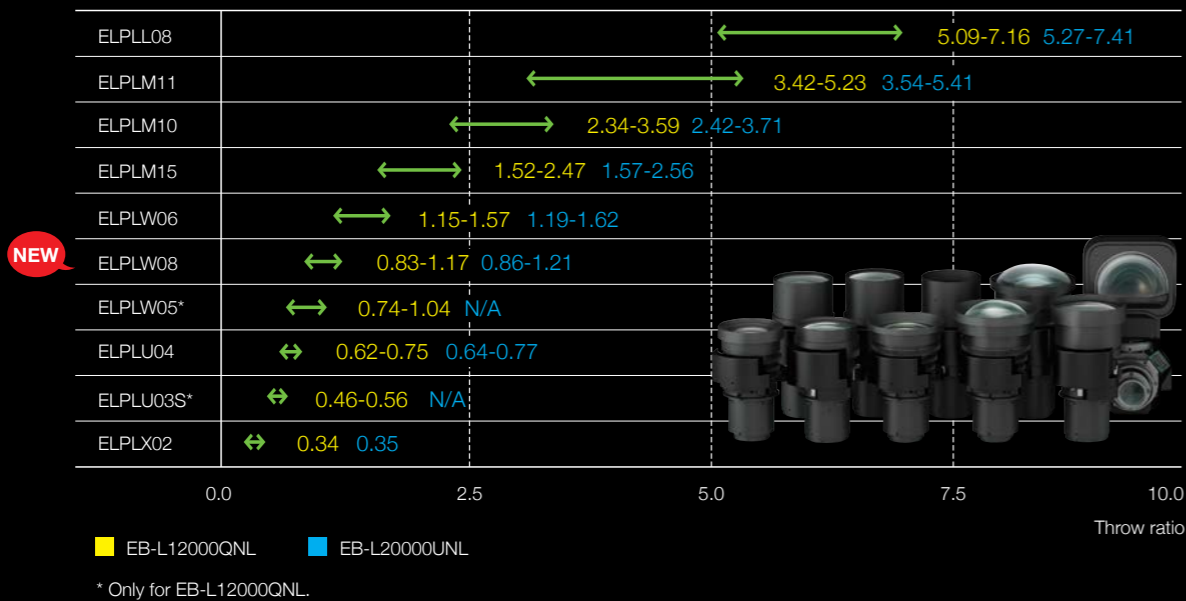

Up to 10 settings can be stored in the projector memory, including shift positions, focus adjustments and projection sizes.

Higher Installation Flexibility

Wide-Range Of Optical Lenses

An extensive line up of optional lenses is available for any venue or subject.

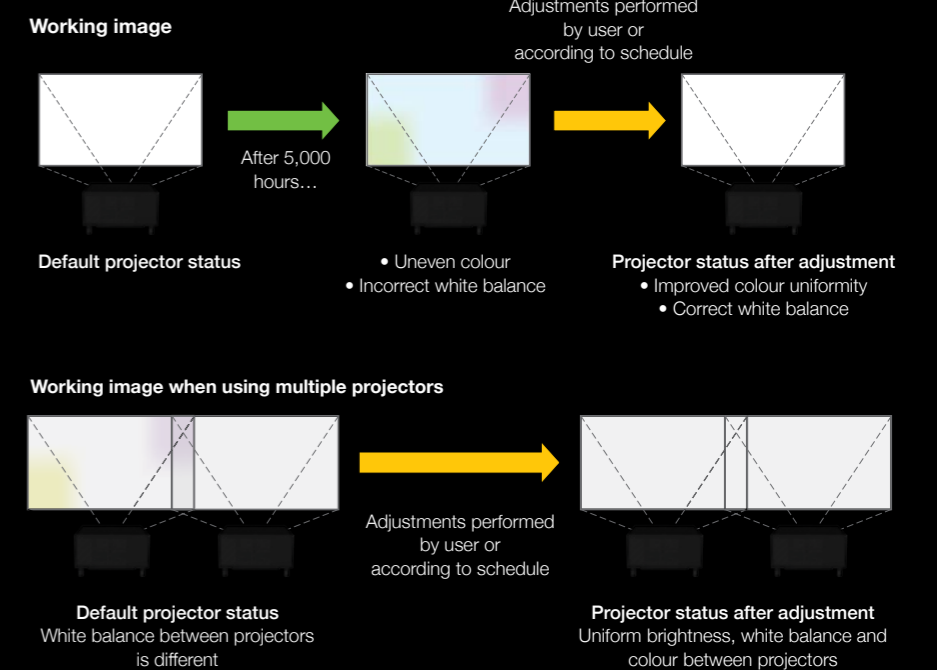

Auto Geometry Correction with Built-In Camera

The built-in camera detects images that are not projected correctly, allowing the projector to automatically correct a variety of geometry corrections like corner and curved projections.

Auto-Colour Adjustment

The built-in camera detects subtle colour inconsistencies between multiple projectors. It detects screens that have become unevenly coloured over time, allowing the projector to automatically correct colour. This function can be set to check colour manually or automatically at regular intervals to deliver stable image quality with minimal maintenance.

Multiple Interfaces

The LAN terminal is a robust, lockable etherCON connector for firm connections even after repeated use. Also, EB-L12000QNL supports 12G SDI* to project 4K images using one cable and outputting a 12G signal from the output terminal. The optional ELPIF03 interface board has a DisplayPort connector that supports 4K – 120 Hz signals.

* Only SDI terminal 1

Higher Installation Flexibility

Epson Projector Professional Tool

The projectors are bundled with Epson Projector Professional Tool software that simplifies setup of multi-projector installations, offering intuitive geometry correction such as edge-blending and corrections for curved surfaces. The software also lets you control colour-matching and brightness.

Tiling Assist

The built-in camera automatically compensates for overlapping areas and corner positions to deliver seamless multi-projector displays, making big-screen projections a snap.

Interface Slot For Expansion

Interface slots allow for a variety of custom hardware according to your usage. Additionally, it allows for new interfaces and interface updates in the future.

ELPIF01: HDMI/DVI
ELPIF02: SDI*
ELPIF03: Display port
* Only for EB-L12000QNL

Web Control With Multi-Device Support

Use a computer web browser or smart devices to adjust projector settings. The newly designed OSD Control Pad function allows control of the OSD menu and even shows a representation of the lens-condition on a smart device.

Epson Projector Management

Using Epson Projector Management allows you to monitor and control multiple network connected projectors (up to 2,000 units) using a computer with easy to use GUI. A projector's power status, irregularities, warnings, etc. can all be determined visually through the use of icons or you can choose to be notified by email of any projector anomalies.

Multi-Directional Projection

EB-L12000QNL/L20000UNL can be rotated 360° in any direction — horizontally, vertically and rotationally — without any loss in image brightness.

Screw Holes For Eyebolts

Screw holes are provided on both the top and bottom. Strong threads make it safe and easy to transport the projector via crane.

Higher Installation Flexibility

Wide Range of Connectivity

EB-L12000QNL/L20000UNL is compatible with a wide range of external devices, and additional ports now include DVI-D, HDMI, HDBaseT and SDI*. Ideal for large venues, HDBaseT can transmit Full HD video, audio and Ethernet at low cost through cat 5e/6 cables up to 100 metres.

* EB-L12000QNL's SDI port will be found in ELPIF02.

DMX-ArtNet

EB-L12000QNL/L20000UNL supports DMX-ArtNet for synchronising lighting effects (such as pre-programmed sequences) with audio.

EB-L20000UNL

Eco Features

- Uses just 0.5W of power in standby mode
- Projector optics employ lead-free lenses
- Unpainted plastic housing reduces the environment impact
- The flame retardants used in the plastic housing do not contain chlorine or bromine

IT'S IN THE DETAILS.

With 3LCD panels, every projection gives you spectacular true colours.

* Leading Epson business and education projectors vs. leading 1-chip DLP® projectors, selected according to NPD data as of July 2015. Based on U.S. research conducted by Radius Research.

** These lumen statistic can be found at www.colorlightoutput.com.

1 Color brightness (color light output) in brightest mode, measured by a third-party lab in accordance with IDMS 15.4. Color brightness will vary depending on usage conditions. Top-selling Epson 3LCD projectors versus top-selling 1-chip DLP® projectors based on NPD sales data for May 2017 - April 2018.

2 Gamut volume in brightest mode, measured by a third-party lab in 3D in the CIE L*a*b* coordinate space. Top-selling Epson 3LCD projectors versus top-selling 1-chip DLP® projectors based on NPD sales data for May 2017 - April 2018.
