

# Adapt4 USB-C

## Active Charge Upgrade

*Actively charge devices while they are in use—anywhere!*

### All-In-One Solution

Avoid low battery classroom disruptions with no wiring or device power cords required. Get the essentials for charging devices at-the-desk in one bundle.

### Get More Mileage

Allows schools to get more use from their current devices, but also remains useful for new USB-C devices in the next refresh.

### USB-C Technology

Adapt4 features Quick-Sense USB-C power delivery, which automatically identifies the devices' power needs to deliver a fast and balanced charge.

The Active Charge upgrade for Adapt4 USB-C Charging Stations provides a better way to keep an active device in each student's hands. Easy to implement, it saves districts time by including all essential items such as four power banks to actively charge devices while in use, adapters to connect older devices, and a USB-C charging station for both the power banks and mobile devices.

# Make Old Device Batteries Last All Day

## Connectors for Devices Without a USB-C PD Port

Active Charge Upgrades are available with USB-C emulator cables to connect most common charging ports. Select the upgrade that includes cables for your specific devices.

## Versatile, Multi-Use USB-C Charging Station

Other power bank products include stations that charge only the banks. Adapt4 charges your power banks AND any devices that you may want to charge when not in use.

## Powerful, High-Quality Power Banks

Active Charge power banks are durable machines with 65W output, sufficient for notebooks, Chromebooks, or tablets.

## Customizable Security

This station provides flexibility for open charging, but it can also be locked for device security. The front door can even be completely removed.
