4-Port USB-C Hub - USB-C to 4x USB-A - USB 3.0 Hub - Bus Powered - White

Product ID: HB30C4ABW

This portable USB 3.0 hub expands your laptop or desktop connectivity by adding four USB Type-A ports through a single USB Type-C™ or Thunderbolt™ 3 port. And, because it's USB bus-powered, you don't need to connect an external power adapter, which makes travel more convenient and workstations less cluttered.

Take it with you wherever you go

With its compact design, you can take this portable USB-C™ hub anywhere you go. It's easy to tuck into your laptop bag and only takes up a small amount of desk space when you connect it to your workstation.

Plus, the hub is bus powered, which means it draws power directly from the USB-C port on your computer. This makes it even more portable because there are fewer cables to carry with you when you travel and it doesn't need an external power adapter.

Keep using your current peripherals and devices

If you're looking to extend the life of your existing USB-A peripheral devices, then this hub is the perfect solution. By converting a single USB-C port into four USB-A ports, you can continue to use all of your existing USB 3.0 devices such as flash drives, external hard drives, and printers. Now you can save money by avoiding the added cost and hassle of purchasing new USB-C equipped peripherals.

Add four USB 3.0 ports in seconds

This USB hub is multi-platform compatible, which means it will work with a wide range of laptops. It also works with a range of operating systems such as Windows®, Mac, Linux® and Chrome OS™. It installs automatically once you connect it to your laptop, so you can be up and running in seconds.

The HB30C4ABW is backed by a StarTech.com 2-year warranty and free lifetime technical support.
