

Specifications

iQ appliance with Intel® Compute Card for SMART Board® interactive displays

Model AM50

Overview

The iQ appliance with Intel® Compute Card is designed specifically to work with SMART Board MX, 6000¹, 6000 Pro², 7000, and 7000 Pro series interactive displays to provide a complete all-in-one experience for classrooms. This solution caters to a whole class, a small group, or individual instruction.

When you install the AM50 model of the iQ appliance in a supported interactive display, you have one-touch access to a full suite of SMART education and third-party applications without connecting an external computer. These applications include the powerful whiteboard, a built-in web browser, access to a number of SMART Learning Suite applications, and multi-platform wireless screen sharing. These native iQ applications provide a simple, yet powerful onboard experience that connects student devices and the interactive display.

Install an Intel Compute Card in the appliance to provide a fully functional Windows® 10 solution at your fingertips, without the need for an external PC or cabling. Choose from two different compute card options to provide a consistent room-to-room Windows Full HD experience, including access to apps in the Microsoft® Store for Education.

NOTE

Each Intel Compute Card comes with Windows 10 Pro.

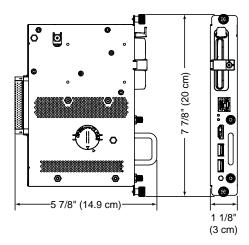

See smarttech.com for more information about the iQ appliance for SMART Board interactive displays.
